We Help Protect the Value of Your Home

OPTION ONE

Fall Heating Tune-Up

We'll inspect your home's filter and airflow. Test and calibrate your thermostat, check your heat exchanger for cracks or damage, tighten all system connections, and complete any other inspection checklist requirements for your furnace and/or heat pump.

OPTION TWO

Spring A/C Tune-Up

We'll inspect your air conditioning unit and all of its' working parts, lubricate its mechanical components, and check ductwork, filters and airflow. We'll test and calibrate your thermostat, check and tighten all connections, and complete your system's inspection checklist.

OPTION THREE

Water Heater Tune-Up

An inspection of the water lines, water heater, temperature and pressure relief valves along with the venting will be completed to ensure unit is operating safely. We will flush out your water heater tank and clean up your burners to ensure proper operations.

OPTION FOUR

Boiler Tune-Up

We will perform an inspection of the venting, draining, process pipes, and fittings for leaks. An inspection of the safeties and controls to ensure normal operations. We will follow and perform routine scheduled maintenance for that boiler which included cleaning of the burners, pilot assemblies, and flame sensors. We will ensure the unit is up to code and in compliance with the manufacturer's specifications.

Preventive maintenance is the best way to avoid costly breakdowns and repairs, while providing greater energy savings, ensuring maximum system life, and making sure your home systems are performing in top condition.

**Call or visit our website today to join the Happy Home Club!
We can schedule your first tune-up right away.**
